

COSC 4330-01/5330-01

Multimedia Processing

Instructor: Prof. JIANGJIANG (JANE) LIU

Homework 3-I

- Write a python program for the following image processing operations and show the images in plots.
- Change one image from RGB to grayscale.
- Change one-fourth of the image into black. Any one-fourth part of the image is fine.
- Submit your python program and images.

Requirement:

In comments at the top of each source code file, place the following:

<your name>

CPSC 4330/5330

Programming Assignment Number:

Questions Number:

Due: <as specified>

Submitted: <date>

<brief description of the problem that the program was written to solve>

Additional documentation should follow the guidelines in the CS Department's Programming Documentation Requirements, which can be accessed at <http://cs.lamar.edu/Programming%20Documentation%20Requirements.pdf>.

Please upload your source codes and screenshots of outputs on BlackBoard.
